Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The submitted IDS has been considered. A copy of applicant-submitted Form PTO1449 is enclosed.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims, the phrases "such as" in claim 1, line 3, claim 11, line 3, claim 14, line 3 and "and the like" of claim 1, lines 2, claim 11, line 2, claim 14, line 2 render the claims indefinite because it is unclear whether the limitations following the phrases are part of the claimed invention. See MPEP § 2173.05(d).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP7-304432 to Odagiri et al in view of JP 11-124017 to Hasegawa.

The principal reference to Odagiri et al discloses the invention substantially as claimed except for the feature of claims 1 and 14 directed to providing stubs for engagement with a wheel for locking the wheel for security purposes and of claim 11 directed to deployable pivot arms which rotate in at least two different directions.

Art Unit: 3683

The secondary reference to Hasegawa teaches both the claimed features.

It would have been obvious at the time the invention was made to one having ordinary skill in the art to which the invention pertains to modify the principal reference to Odagiri et al to replace the wheel lock arrangement with one similar to that of Hasegawa since such modification involves replacing one well-known type of wheel lock with an equivalent type of wheel lock. The assemblies operate in substantially the same manner with substantially the same effect. The use of arms, which can rotate in different directions, is desirable in that such multi-axis manipulation ~~of~~ aids in both deployment and assembly of the portable wheel chock and aids in disassembly and collapsing of the wheel lock for ease in storage.
